## 1. INTRODUCTION

On behalf of the Canadian Cooperation Office (CCO), Canadian International Water and Energy Consultants (CIWEC) have entrusted the INVENTORY STUDY OF TUBEWELLS of Rautahat and Morang Districts to United Designers & Associates (UDA), Hitty Durbar, Kathmandu. The agreement of this study was executed on December 22, 1988.

## 2. OBJECTIVES OF THE PRESENT STUDY

The aims and objectives of the study are to conduct an inventory study of groundwater use with particular emphasis on Ground Water use by farmers for irrigation. In order to meet the aims and objectives of this study the work has been divided into the following four stages.

- (i) Desk Study and Reporting
- (ii) Field Work
- (iii) Draft Reporting, and
- (iv) Final Reporting

During desk study, data on tubewells were collected from different related agencies. Review of available reports on groundwater study were also carried out. However, it is realized that no information on privately owned tubewells are available anywhere. Hence, to seek additional up-to-date and on-the-spot data and information regarding groundwater use and also to verify the data collected during the desk study stage, a field survey was carried out in both the districts. This report is the outcome of the desk study and the field work.

## 3. DESCRIPTION OF THE STUDY AREA

### 3.1 Rautahat District

#### 3.1.1 Location

The project area 'Rautahat' is situated in Narayani Zone of the Central Development Region of Nepal with headquarter in Gaur. Politically this district is surrounded by Sarlahi District in the East, Bara District in the West, Makawanpur District in the North and State of Bihar Boarder (India) in the South. The altitude of this district ranges from 70 metres to 800 metres above mean sea level. This district which occupies an area of 1,259 square kilometres, supports 101 village panchayats. Geographically this district lies between 26 44' and 27 14' north latitude and 85 14' and 85 30' east longitude.

#### 3.1.2 Accessibility

Rautahat District is well linked through Mahendra Rajmarga to almost all

major parts of Central and Eastern Nepal. A portion of Mahendra Rajmarga passes from this district. Chandranigahapur, one of the important panchayat of this district lies on the Mahendra Rajmarga. An all weather gravel road links Chandranigahapur to Gaur, the district headquarter. Apart from this main road, a network of other dirt roads exist within the district. The nearest air field is Simara, about 50 km away by road. Other communication services like postal, telecommunication services are readily available in the district headquarters at Gaur and at Chandranigahapur Panchayat.

### 3.1.3 Climate

#### a) Temperature

There is only one rainfall station at Gaur, which just records rainfall, there is no station within the district which records temperature and humidity. The closest full recorded meteorological station of the district is Parbanipur. Table - 1 below indicates the mean monthly average temperature.

Table - 1

Average Mean Monthly Temperature of Parbanipur Station (°C)  
(Mean of 10 years, 1975 - 1984)

Month	Maximum	Minimum
January	22.5	8.2
February	24.8	10.2
March	30.6	14.1
April	35.1	19.6
May	35.2	23.3
June	35.2	25.4
July	32.3	25.7
August	32.8	25.8
September	32.3	24.8
October	32.3	24.6
November	31.6	20.6
December	28.8	14.3

#### b) Precipitation

The precipitation, is taken from Gaur as well as from Parbanipur Station. Table - 2 shows the average mean monthly precipitation of Gaur station and Table - 3 shows the average mean monthly precipitation of Parbanipur Station.

Table - 2

-----  
 Monthly Precipitation of Gaur Station  
 (Average of 5 Years)

Month	Precipitation, mm
January	25
February	13
March	3
April	66
May	145
June	199
July	347
August	481
September	276
October	108
November	2
December	18

Table - 3

-----  
 Monthly Precipitation of Parbanipur Station  
 (Average of 10 years, 1975 - 1984)

Month	Precipitation (mm)
January	19.30
February	9.60
March	12.50
April	38.50
May	145.70
June	254.80
July	501.90
August	212.80
September	439.00
October	65.00
November	6.00
December	9.90
Annual	1463.80

c) Relative Humidity

The mean monthly average relative humidity record in Parbanipur Station for 10 years is given in Table - 4.

Table - 4

Average Relative Humidity of Farbanipur Station  
(Average of 10 years, 1975 - 1984)

Month	Relative Humidity (%) 8.30 hrs.	Relative Humidity (%) 17.30 hrs.
January	85.90	72.20
February	78.10	60.00
March	61.90	47.20
April	53.80	41.30
May	65.70	53.30
June	74.50	66.70
July	83.60	77.90
August	81.80	78.50
September	81.70	78.80
October	76.90	74.10
November	74.50	72.00
December	82.20	72.60

#### 3.1.4 Topography

The topography of this district is generally plain terai. The variation of elevation is 730 metre 70 m to 800 m amsl) within the entire district.

The major rivers of this district are Bagmati towards the extreme east, Aruwa towards the extreme west and Lalbakiya, Lamaha, Chhandi, Jhhangi and Chhanchi are other rivers, all flowing from north to south.

#### 3.1.5 Transportation and Communication Facilities

##### a) Transportation

From the transportation point of view, this district is well facilitated with regular day and night bus service from major cities of the Kingdom. No other transportation systems other than road services exist in the district. The nearest air field is Simara (approximately 50 km away).

Table - 5 provides general information about the transportation facilities in the district.

Table - 5

-----  
Transportation Facilities in Rautahat District

Type of Transport	Road Type	From	To	Distance
Bus (Day & Night)	Hyghway	Kathmandu	Narayanghat	160 km
,, ,,	Mahendra Rajmarga	Narayanghat	Pathalaiya	135 km
,, ,,	Mahendra Rajmarga	Pathalaiya	Chandranigahapur	45 km
Bus (Day)	District	Chandranigahapur	Gaur	42 km
,, ,,	District	Birgunj	Kalaiya	12 km
,, ,,	Gravel/dirt	Kalaiya	Gaur	43 km

## b) Communications

Rautahat District is furnished with different types of communication services. Most of the services are centralized in the district headquarter, Gaur. The following communication media exist:

## i. Postal Services

The district post office is located in the district headquarters, Gaur. Two sub-post offices are located in Samanpur and Chandranigahapur. Fourteen additional post offices are also functioning in the district.

## ii. Telecommunication Services

The district telephone exchange with microwave service is located in Gaur. Direct telephone service to and from Gaur to various other parts of the Kingdom is available. Telephone service also started at other important village panchayat like Chandranigahapur and is expected to expand to other areas as well.

## 3.1.6 Demography

The total population of Rautahat district according to the census conducted during 1981 is 334,524 spread over 101 village panchayats. The ratio of male to female population is 1:0.95.

The density of population is thus 265.50 persons per sq km. The estimated growth rate of the population as of 1980 is 2.52%.

The economically active population is 40%. Agriculture is the main occupation of the people which cover approximately 95%. Table - 6 indicates the various occupation of the district population.

Table - 6

Percentage of Population on Various Occupation

S.No.	Occupation	Percentage of economically Active Population
1.	Agriculture	95.0%
2.	Personal and Community Service	1.5%
3.	Commerce and Trade	1.0%
4.	Manufacturing Industry	0.5%
5.	Other Minor Professions	2.0%

Bhojpuri is the main tribe which constitute almost 88% of the total population. Other major tribes are Nepali 4.5%, Maithilis 2.7% and Newars, Magars, Gurungs Rais etc. 4.8%.

### 3.1.7 Education and Public Health

This district is provided with adequate middle level education facilities. As of 1981 records, the district is provided with 139 primary schools, 37 lower secondary schools and 13 secondary schools. Annual enrollment in these schools is over 20,000 which includes about 15% girls and 85% boys. Higher education is obtained in Kalaiya and Birgunj.

The district level hospital is in Gaur. Health posts are spread all over the district. One ayurvedic centre is also available in Pipara Village Fanchayat.

Portable drinking water is provided in Gaur and Chandranigahapur through the Drinking Water Projects operated by the Department of Water Supply and Sewerage. Drinking Water Projects in other village panchayats are underway.

### 3.1.8 Socio-Economic

The main earnings of the people are from agriculture, as 95% of the economically active population are involved in agriculture. Almost 75% of the total district area is under cultivation. The tenants to land owners ratio is 1:6. The per capita land holding as of 1976 is 0.27 ha. The average family size is 5 persons per household, which is moderate size for the farmers. The average yield of the district is given in Table - 7.

Table - 7

## District Level Cultivation Production (Average 5 years)

Crops	Area (ha)	Production (mt)	Yield (kg/ha)
Paddy	66,678	102,192	1,533
Maize	3,976	6,065	1,525
Wheat	15,966	17,307	1,084
Millet	592	529	894
Barley	1,616	1,357	840
Potato	511	2,645	5,176

Source: Agricultural Statistics of Nepal.

There is no deficit of foodgrains within the district. The surplus foodgrains is sold in Birgunj, Janakpur and other towns of the Kingdom.

Livestock also plays another important role in the earnings of the district farmers. Each family has one cattle, one goat, one poultry and half buffalo in average.

Table - 8 provides the position of livestock during 1979.

Table - 8

## Livestock of Rautahat District

Type	Estimated Population
Cattle	95,832
Goats	80,068
Poultry	84,002
Buffaloes	31,019

Source: Nepal District Profile.

## 3.1.9 Credit and Banking Facilities

The district has a network of credit and banking facilities as shown below:

Agricultural Development Bank	:	Branch Office	:	Gaur
Agricultural Development Bank	:	Sub-Branch	:	Chandranigahapur
Agricultural Development Bank	:	Depot	:	Katahariya
Nepal Bank Limited	:	Branch Office	:	Gaur
Nepal Bank Limited	:	Sub-Branch Office	:	Chandranigahapur
Nepal Bank Limited	:	Sub-Branch Office	:	Katahariya
Rastriya Banijya Bank	:	Branch Office	:	Gaur

## 3.2 Morang District

### 3.2.1 Location

The project area 'Morang' is situated in Koshi Zone of the Eastern Development Region of Nepal, with headquarters in Biratnagar, an industrial town panchayat. Politically Morang district is surrounded by Jhapa and Ilam Districts in the East, Sunsari District in the West, Dhankuta and Panchthar Districts in the North and State of Bihar Boarder (India) in the South. The altitude of this district ranges from 140 to 2,409 metres above mean sea level. The total area occupied by this district is 1,914 square kilometre. Geographically Morang District lies between 26 20' and 26 53' north latitude and 87 16' and 87 41' east longitude. According to 1982 records Morang District has 1 town panchayat and 65 village panchayat.

### 3.2.2 Accessibility

Morang District is well linked through Mahendra Rajmarga to almost all part of the Central and Eastern Towns of Nepal. A portion of Mahendra Rajmarga passes east to west from this district almost dividing the district. Biratnagar, an important industrial town of Eastern Nepal, is the district headquarters. This town has a good airport and vehicular road network. Apart from these roads the district is supported with gravel roads, dirt roads and tracks connecting the different village panchayats.

The communication service like postal service, telecommunication service etc. are readily available in the district headquarters, Biratnagar.

### 3.2.3 Climate

Due to the large variation in elevation, this district experiences both tropical and subtropical climate. The coldest month is January with an average temperature of 8.6 C and the hottest months are April to June when the high temperature is upto 36.6 C. The mean annual precipitation of the districts averaged over 10 years is 1,775 mm. The dry months are November, December and January when the precipitation is close to zero. The relative humidity ranges from 29% (evening March 1976) to 94% (morning January 1979).

#### a) Temperature

The temperature recorded in the Biratnagar Airport is given in Table - 9.

Table - 9

Mean Monthly Temperature of Biratnagar Airport ( C )  
(Average of 10 years, 1975 - 1984)

Month	Maximum	Minimum
Janaury	23.40	8.60
February	25.80	10.60
March	31.20	14.70
April	33.80	20.50
May	32.90	23.00
June	32.60	25.10
July	31.60	25.50
August	32.00	25.10
September	31.60	24.20
October	31.20	20.80
November	28.70	14.60
December	25.10	10.60

## b) Precipitation

The precipitation records taken from Biratnagar Airport (1979 - 1984) show that Morang District experience maximum annual rainfall of 2,110 mm (1984) and minimum of 1,403 mm (1983). The mean monthly maximum precipitation recorded is 682 mm in July 1984, and minimum of 0.00 during November to March. Table - 10 gives a clear idea about the mean precipitation for 10 years.

Table - 10

Monthly Precipitation of Biratnagar Airport  
(Average of 10 years, 1975 - 1984)

Month	Precipitation (mm)
Janaury	7.70
February	9.00
March	17.50
April	46.50
May	170.30
June	301.40
July	552.00
August	277.80
September	286.70
October	60.80
November	12.90
December	5.20
Annual	1775.00

c) Relative Humidity

The mean monthly average relative humidity recorded in Biratnagar Airport for 10 years is given in Table - 11.

Table - 11

Relative Humidity at Biratnagar Airport  
(Average of 10 years, 1975 - 1984)

Month	RH % 8.30 hrs	RH % 17.30 hrs
January	90.1	63.3
February	81.5	53.4
March	60.2	37.8
April	58.9	42.1
May	69.7	59.0
June	80.4	71.2
July	86.1	78.5
August	83.0	78.6
September	84.4	78.9
October	79.0	73.4
November	80.0	66.9
December	86.6	65.4

3.2.4 Topography

The general topography of this district is about 85% plain terai with 15% mid hill towards the north. The difference of elevation in plain area is 100 to 150 metres and the difference of elevation in the north side belt is about 1,500 metres.

The major rivers of the district are Shahare/Budhi/Kausalya Nadi towards the extreme west, Ratuwa Nadi towards the extreme east, Singiya, Lohendra, Chisang, Dans or Bakra and Bakraha rivers are between these two rivers.

3.2.5 Transportation and Communication Facilities

a) Transportation

Biratnagar, the district headquarter of Morang District, is the largest industrial town. The transportation network of this district is well facilitated. Biratnagar is considered to be the second largest town in the country next to Kathmandu. Regular day and night bus services are available from all major cities of the Kingdom. One well equipped airport is located in Kanchanbari, 4 km north of the district headquarters. From this eastern regional airport, all flights to the eastern sector are being operated.

Table - 12 provides general information on the road transportation available in the district.

Table - 12

## Transportation Facilities in Morang District

Type of Transport	Road Type	From	To	Distance
Bus (Day & Night)	Hyghway	Kathmandu	Narayanghat	160 km
" "	Mahendra Rajmarga	Narayanghat	Pathalaiya	135 km
" "	Mahendra Rajmarga	Pathalaiya	Itahari	273 km
" "	Highway	Itahari	Biratnagar	25 km
" "	Highway	Kathmandu	Biratnagar	380 km
" "	Highway	Dharan	Biratnagar	46 km
" "	Highway	Kakarvitta	Biratnagar	116 km

## b) Communication

Since Biratnagar is one of the oldest industrial city of the Kingdom every possible communication links Biratnagar to Kathmandu. Thus, Morang District is furnished with a good communication facilities network.

## i) Postal Services

Regional post office, zonal post office, foreign post office and district post offices are operated from Biratnagar.

The network of 7 sub-post offices, 15 additional post offices and 4 cooperative post offices are spread throughout the district.

## ii) Telecommunication Service

Both the regional and district telecommunication offices of NTC are operated in Biratnagar with all modern facilities. From Biratnagar any major area of Globe can be contacted through telex, telephone and telefax.

## 3.2.6 Demography

The total population of Morang District according to the census conducted during 1981 is 534,490 spread over 64 village panchayats and one town panchayat. Of the total population, the male population is 52% and the female population is 48%. The density of population of this district 279 persons per square kilometre. The estimated growth rate of the population is 2.32% based on the 1980 census. The size of family is approximately 5.5 per household.

Economically active population comprises almost 35% of the total population.

Table 13 provides the occupational break-up among tlital economically active population.

Table - 13  
Percentage of Population on Various Occupation

---

Occupation	Percentage of Economically Active Population
Agriculture, Forestry, Fishing	80%
Community Service	8%
Manufacturing	6%
Commerce	4%
Others	2%

Norang district is composed of mixed tribes with Brahmin, Chhetris (Nepali speaking) about 34%, Maithilis 18%, Tharus 12% and others 36%.

### 3.2.7 Education and Public Health

This district is well supported with different levels of institutions of various disciplines. According to the survey conducted during 1980/81, the district has 186 primary schools, 111 lower secondary schools and 35 secondary schools. Recently a number of private english medium schools were also opened. Over 65,000 school level students are enrolled every year.

This district also has 6 campuses run by Tribhuvan University and 1 Private Campus for higher education. Higher education facilities in humanities, social services, management, pure sciences and medicine are available within the district. The capacity of enrollment in higher education is over 2,500 every year.

The district has two fully furnished hospitals. Koshi Zonal Hospital is in Biratnagar having 100 beds and Rangeli Hospital in Rangeli with 15 beds. Apart from these hospitals, this district also has 11 health posts spread over the district.

Portable water is available for drinking in Biratnagar town and other main panchayats of the district. Similarly electric power for lighting and industries are also available in Biratnagar and other main panchayats.

### 3.2.8 Socio-Economic

Biratnagar is the largest industrial town of eastern Nepal and therefore the occupation of the people is some how influenced by industry and trade. The occupation of the people of inward and northern size of the district is mainly agriculture. In overall district, 80% of the population still depending on agriculture.

As of 1980/81 record 52% of the total district area is under cultivation out of which about 40% of the land is irrigated by surface irrigation. The per capita of holding is generally 1.0 ha with tenant versus land owners as 1:2.

The average family size is 5.5 person per household.

The average yield of the district is shown in Table - 14.

Table - 14  
District Level Cultivation and Production (Average of 5 Years)

Crops	Area (ha)	Production (mt)	Yield (kg/ha)
Paddy	83,583	148,529	1,777
Maize	5,316	7,818	1,471
Wheat	10,204	11,665	1,143
Millet	956	930	973
Barley	70	58	829
Potato	813	4,719	5,804

Source: Agricultural Statistics of Nepal.

This district is always has a food surplus, which is either sold in the Biratnagar market or sent to other food deficit area.

As of 1977 survey the population of the livestock in the district is given in Table - 15.

Table - 15  
Livestock of Morang District

Cattle	143,837	Goats	62,615
Pigs	9,423	Sheep	5,673
Poultry	139,574	Buffaloes	42,790

Source: Nepal District Profile

Several industries exist in this district, viz. Jute, Match, Sugar, Metal, Textile, Knitting and Weaving, Bidi, Furniture, Herbs Processing, Brick and Tile, Milling, Soap, Leather and many others which are giving employment opportunities to almost 5% of the population.

### 3.2.9 Credit and Banking Facilities

This district has a network of financial institutions and banking facilities as shown below:

Agricultural Development Bank	: Regional Office	: Biratnagar
Agricultural Development Bank	: Branch Office	: Biratnagar
Agricultural Development Bank	: Sub-Branch Office	: Rangeli
Agricultural Development Bank	: Sub-Branch Office	: Belbari
Nepal Bank Limited	: Zonal Office	: Biratnagar
Nepal Bank Limited	: City Office	: Biratnagar
Nepal Bank Limited	: Branch Office	: Mills area, Biratnagar

Nepal Bank Limited	:	Sub-Branch Office	:	Rangeli, Urlabari Chowk Bazar.
Rastriya Baniyya Bank	:	Regional Office	:	Biratnagar
Rastriya Baniyya Bank	:	Branch Office	:	Rani, Bargachi, Katahari
Nepal Industrial Development Corporation	:	Regional Office	:	Biratnagar
Nepal Rastra Bank	:	Branch Office	:	Biratnagar

#### 4. DATA COLLECTION

Relevant maps, data and other various informations pertaining to the project have been collected from the different offices in Kathmandu.

##### 4.1 Ground Water Development Consultants (International) Limited

Ground Water Development Consultants (International) Limited, Cambridge, United Kingdom had made a study of ground water development strategies for irrigation in the Terai of Nepal. The study was done in the three phases:

- i. Preliminary phase lasting a month and a half concluding with a preliminary evaluation report in October 1986.
- ii. A field work and detailed data collection phase from January to April 1987.
- iii. A detailed analysis and planning phase from May to August 1987.

The overall objective of the study was to determine the most suitable strategy for groundwater irrigation development in 18 terai districts of Nepal (Dang and Chitwan being inner terai districts, not included in the study).

The final report was presented to HMG, DIHM, and the Ground Water Resources Development Board on December 1987.

Chapter 3 of their Main Report (Volume I) deals with the ground water irrigation in the terai and table 3.3 in their report shows the distribuion of successful terai shallow tubewells by districts as of mid 1987.

Table 16 shows the data on successful shallow tubewells/wells in Rautahat and Morang Districts as abstracted from Table 3 of the said report.

Table - 16

## Numbers of Successful Tubewells/Wells

	Rautahat District	Morang District
Deep tubewells	-	17
Shallow tubewells (As of mid 1987)	745	1278
Dug wells	40	-

The depth of shallow water table contours and area of flowing artesian zone has been taken from Volume VI of the said report and is indicated in study area reference plan.

4.2 Agricultural Development Bank

Extensive data on shallow tubewells were taken from the records of ADB/N, Kathmandu Office. According to the record available in Kathmandu Office, ADB/N appeared to have distributed loan as below.

Financial Year	Number of Tubewells	
	Rautahat	Morang
2044/45	159	48
2043/44	147	129
2042/43	82	95
2041/42	100	168
2040/41	22	257
2039/40	175	325
Total	685	1,022

4.3 Sagarmatha Integrated Rural Development Project

SIRDPA appeared to have provided assistance to the following tubewells:

Fiscal Year	Number of Tubewells	
	Rautahat	Morang
2044/45	-	-
2043/44	-	24
2042/43	-	21
2041/42	-	30
2040/41	-	-
2039/40	-	3
Unknown	-	22
Total	-	100

#### 4.4 Department of Hydrology, Ground Water Division

The water level of various tubewells is being recorded in 27 panchayat of Morang district by DIHM, Ground Water Division. The records on the depth of water level is available for January, March, May, July, September, October, November, December 1988 and September and November 1987, and is given in Appendix C.

#### 4.5 United Nations Department of Technical Corporation for Development

Under GWRDB - UNDP Nep/86/025, shallow ground water exploration in terai, the study of shallow wells drilling, testing and monitoring in 1987/88 of Rautahat district was conducted by U.N. Department of Technical Cooperation for Development and presented technical report no. 3 during November 1988.

Table - 17 indicates the most pertinent data on well drilling of the Rautahat district.

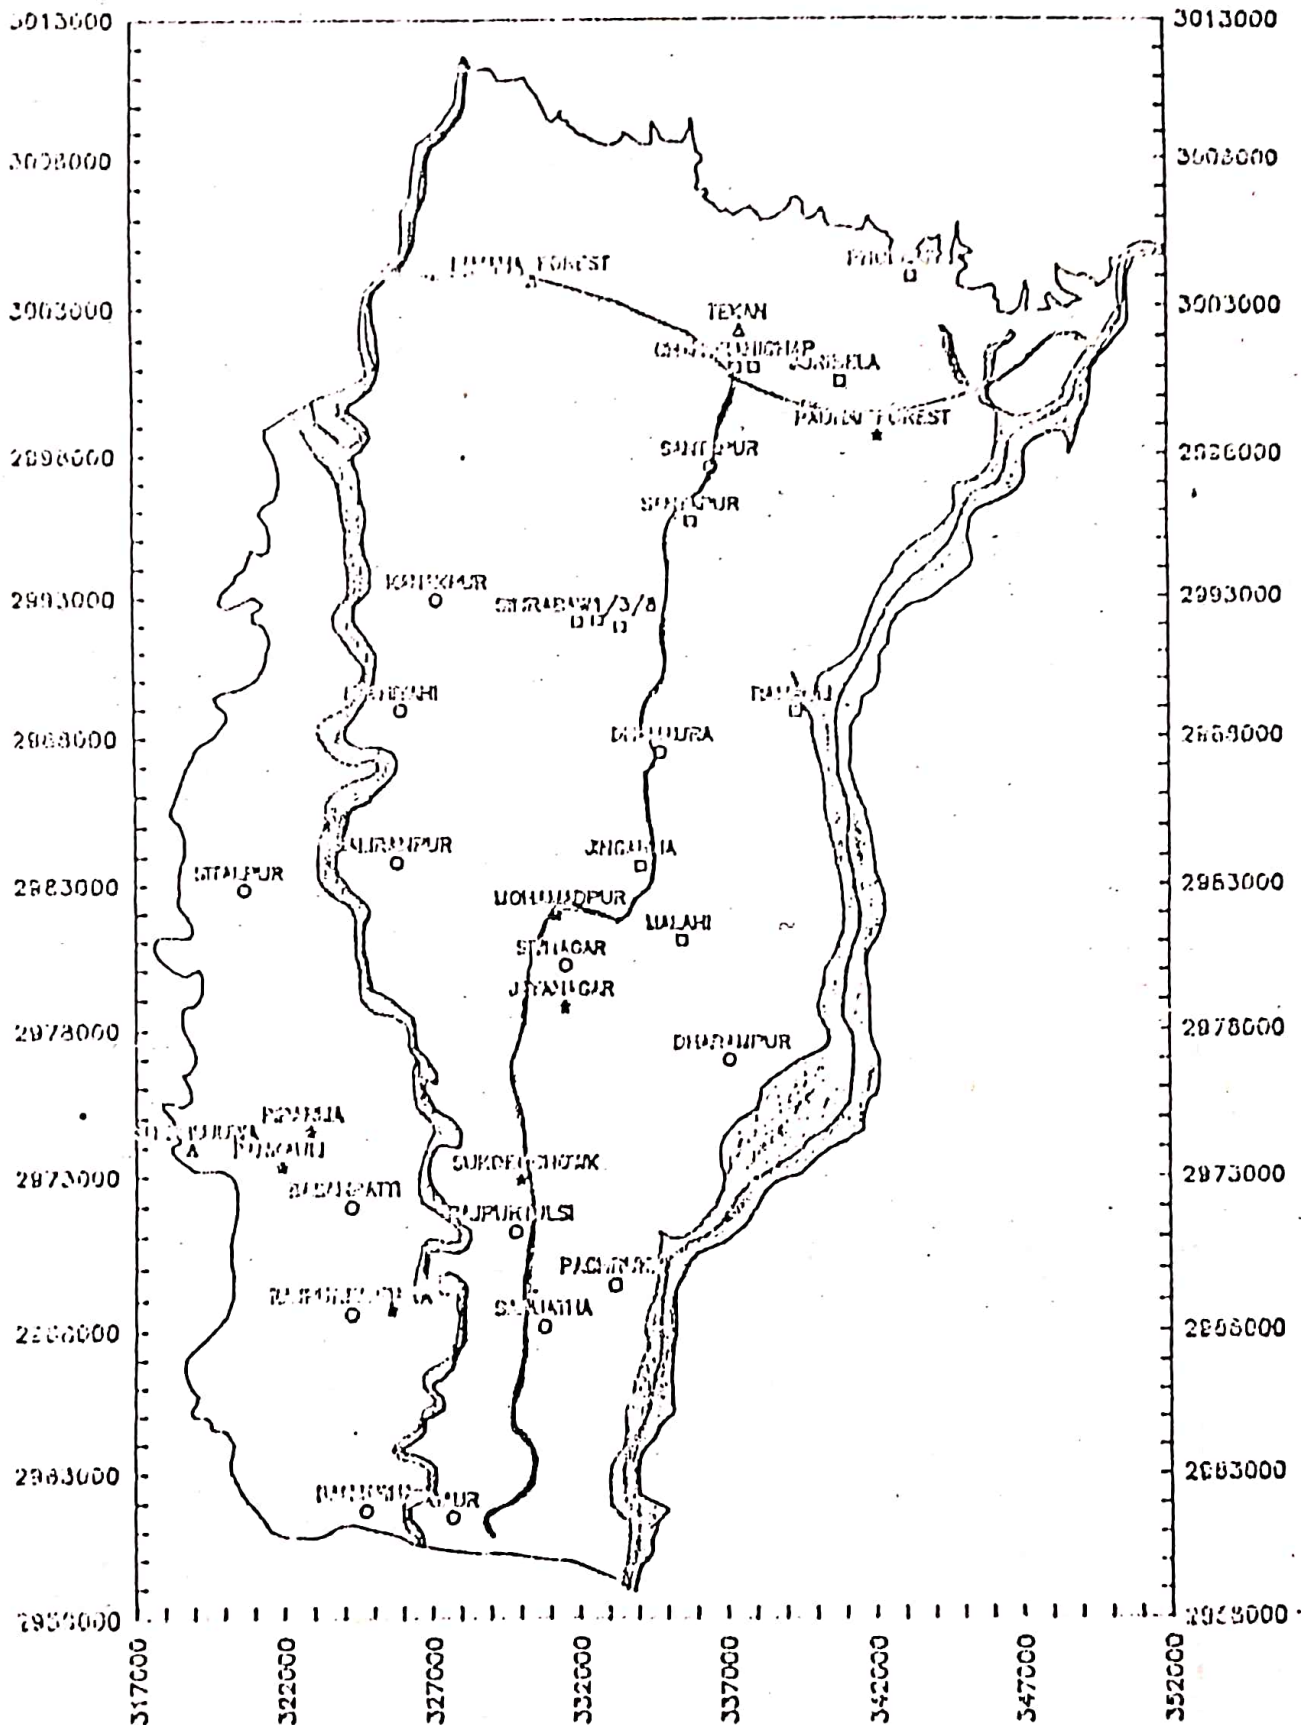

Table - 17

<u>Panchayats</u>	<u>Depth of Drilled</u>	<u>Remarks</u>
Damoura	45.10	
Dhoranpur	24.50	
Mohamudpur	51.60	Abandoned
Sukdev Chowk	51.60	"
Jaya Nagar	38.70	"
Pipariya	51.60	"
Banhaul	51.60	"
Rajpur Ferdewa	51.70	"
Banjarha	20.50	
Gaur	18.30	
Sarautha	25.30	
Panchrukhi	30.40	
Rajpur Ferdewa	25.90	
Rajpur Tulsi	18.30	
Santapur	45.40	
Lamaha Forest	32.90	
Tekan	20.50	
Balirampur	17.70	
Hathiyayi	15.20	
Sitalpur	24.30	
Kanakpur	13.10	
Sir Nagar	12.20	
Basentapalti	15.20	
Pourai Forest	23.10	Abandoned
Sarmujuwa	21.30	

Out of the 25 numbers of wells drilled, 7 numbers have been abandoned.

The location of project wells and north south cross-sections of the Rautahat district is shown in Fig. (ii) and Fig. (iii).

Fig (iii)

#### 4.6 Department of Agriculture

The Department of Agriculture do not have any records of any tubewell irrigation systems. They have not sponsored/assisted for any tubewells.

The Department of Agriculture had compiled the district level area of cultivation, production of main crops, the yield of main crops etc. for each district. These data are compiled fiscal yearwise.

The district level average area of production of foodgrains, total production of foodgrains and yield are given in Appendix F.

#### 4.7 Department of Survey

Topographic map of 1:50,000 scale as well as the district maps were obtained from Department of Survey, for preparing the study area reference plan.

### 5. WATER RESOURCES

#### Surface Water

There are numbers of rivers flowing north-south in the Rautahat district, namely Aruwa, Lalbakiya, Lamaha, Chhaudi, Jhhangi, Chhanchi and other minor rivers.

Similarly there are numbers of rivers flowing north-south in the Morang district, namely, Shahare, Budhi, Kaushiva, Ratuwa, Singiya, Lahendra, Chisang Bakra, Bakraha and other minor rivers.

#### Ground Water

From the report the study of Ground Water Development Strategies for Irrigation in the Terai by Ground Water Development Consultants, Cambridge, U.K. (Report Vol. 6), the water table in Rautahat district is available 4 to 5 meter below average ground level within the entire plain area of the district. Similarly the water table in plain area of the Morang district is available 4 to 7 meter below average ground level. (Refer Fig. iv and v).

#### Tubewells

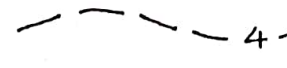

The data collected from Agricultural Development Bank, Nepal shows that there are ample shallow tubewells operated for irrigation in both Rautahat and Morang Districts.

6. DESK STUDY

Following the agreement on December 22, 1988, the engineers, overseers and assistants collected data on Tubewells of Rautahat and Morang Districts. The detailed data was available only from the Agricultural Development Bank and Sagaramatha Integrated Rural Development Project. The study report prepared by Groundwater Development Consultants (International) Limited and the report prepared by United Nations Development of Technical Co-operation for Development were found very helpful in the present study.

Table - 18 shows a summary of tubewell data.

Table - 18  
-----  
Summary of Tubewell Data

	Rautahat District	Morang District
Groundwater Dev. Project	25	28
Loan from ADB/N	685	1022
SIRDP	-	100
TOTAL	Nos. : 710	Nos. : 1150
BWDC Ltd., Report	Nos. : 745	Nos. : 1278

The data from two different source appeared different. It is possible that the ADB/N Head Office do not have current data.

## 7. FIELD SURVEY WORK

### 7.1 Mobilization

In order to verify the data collected during the desk study work, the field study works were carried out. Prior to the field visit, field questionnaires were prepared and discussed with WECS. Since the number of panchayats has been found to be more than anticipated previously, and in order to complete the field work in the available short times, three field teams were mobilized to collect the data on Tubewells of Morang District (first week of Feb. to fourth week of Feb. 1989). Similarly three field teams were mobilized to collect the data on Tubewells of Rautahat District (third week of Feb. to 1st week of March 1989).

### 7.2 Data Collection

#### a) From Various District Offices

The field team visited the various regional offices and branch offices and collected data on Tubewells of Rautahat and Morang Districts. Those offices visited were:

- Maintenance Survey Section of Rautahat & Morang Districts.
- Agricultural Development Bank Zonal Office, Morang.
- Agricultural Development Bank Branch & Sub-Branch Offices (Biratnagar, Rangeli, Itahari, Belbari and Herabari in Morang District).
- Small Farmers Office (ADB/N) in Morang & Rautahat Districts.
- District Panchayat Offices of Morang & Rautahat Districts..

#### b) From Panchayats

It was intended that the field team would collect Tubewell data from village/town panchayat offices. The panchayat offices do not have recorded data of Tubewells and therefore the field team had to collect data by visiting wards of the panchayat. The principle comments on such collected data is given below:

- It was experienced that the villagers do not wish to provide correct data as they feel that if all existing number of tubewells are recorded, they are afraid that they will not be able to obtain further loan from the bank.
- Those Tubewells for which the loan had already been repaid are presented as their private investment.
- In some cases, it was also found that the farmers sell their Tubewells to other villagers.
- The profile on Tubewells, which is recorded in detail, is based on interviews with the farmers/villagers. The area, the production, operating hours, expenditure of fuel, cost of installations, all are based on interviews with local farmers on their judgement.

## 8. STUDY OF SHALLOW TUBEWELL

### 8.1 Rautahat District

#### 8.1.1 Number of Tubewells

There are 101 village panchayats in Rautahat district. Out of 101 village panchayats, tubewells do exist in 91 village panchayats. Altogether 1647 tubewells were installed in this district out of which 35 tubewells have been found already damaged. Among the total numbers of tubewells, 847 numbers were funded by ADB/N, 29 numbers were funded by Rautahat district panchayat, 21 numbers were installed by Ground Water Development Project, 5 numbers were installed by Red Cross, one number was installed by Japanese Agriculture Development Project and 744 numbers were installed using private funds.

#### 8.1.2 Command Area Covered

The 1647 tubewells irrigates 4071 ha command area of Rautahat District. The average command area of each tubewell has been calculated to be 2.47 ha. The maximum intensity of the command area recorded was 8.06 ha per tubewell in the Pratapur village panchayat and the minimum intensity of the command area recorded was 0.68 ha per tubewell in Debhai village panchayat.

#### 8.1.3 General Size of the Boreholes

The general size of the boreholes of the tubewells are 100 mm (4"). The other popular size of tubewell is 50 mm. A few 150 mm size (6") tubewells are also found in the district.

#### 8.1.4 Operating Season

Generally tubewells are being operated year round. Generally, they are operated for winter crops and sometimes (when there is no timely rain) they are operated also for summer crops. Depending upon the type of the crop and the requirement of water in the field, the tubewells sometimes operate round the clock. However, on average the tubewells operates 2 to 11 hours a day for about 3 months a year.

#### 8.1.5 Operating Mode

All 100 mm size and 150 mm size tubewells are being operated by diesel engine (pump), the consumption of diesel is 1.00 to 1.25 litre per hour. 50 mm size tubewells, and 38 mm size tubewells are operated by manual hand sets or sometime manual rower pumps.

### 3.1.6 Average Depth of Tubewells

So far as the depth of tubewell is concerned, it varies widely. Generally the depth of the 100 mm dia tubewell appeared to be 11 to 20 meters. However, the smaller dia tubewells (50 mm and 38 mm) are taken 6 meter to 12 metre deep. Thus, the average depth of tubewells in general is about 16 metres.

### 8.1.7 Yield

The yield value of the crop has been found different from place to place depending upon the type and nature of the soil and other factors. However, the average yield of the crop has been recorded to be 1.5 mt/ha to 2.1 mt/ha per crop. Generally 200% cropping intensities have been recorded.

### 8.1.8 Panchayatwise List of Tubewells

The list of shallow tubewells of the Rautahat district showing total numbers, financing agencies and wardwise distribution of tubewells (village panchayatwise) is given in Table - 19.

### 8.1.9 Panchayatwise Distribution of Tubewells and Command Area

The panchayatwise distribution of tubewells, command area covered by tubewells and average command area per tubewell are shown in Fig. vi, Fig. vii and Fig. viii respectively.

### 8.1.10 Profile of Tubewells

The profile of 1647 existing tubewells of Rautahat district is given in Appendix - A.

## LIST OF SHALLOW TUBEWELLS OF RAUTAHAT DISTRICT

S.No.	Village Panchayats	No. of Tubewell			Financing Agencies					Wardwise Distribution of Tubewells

Note: Karuniya, Jayanagar, Dharampur, Gadhiquti, Pathahi, Dharhari, Saharhiya, Pipara Pokhariya, Laximpur and Paurahi Panchayats do not have any tubewells.

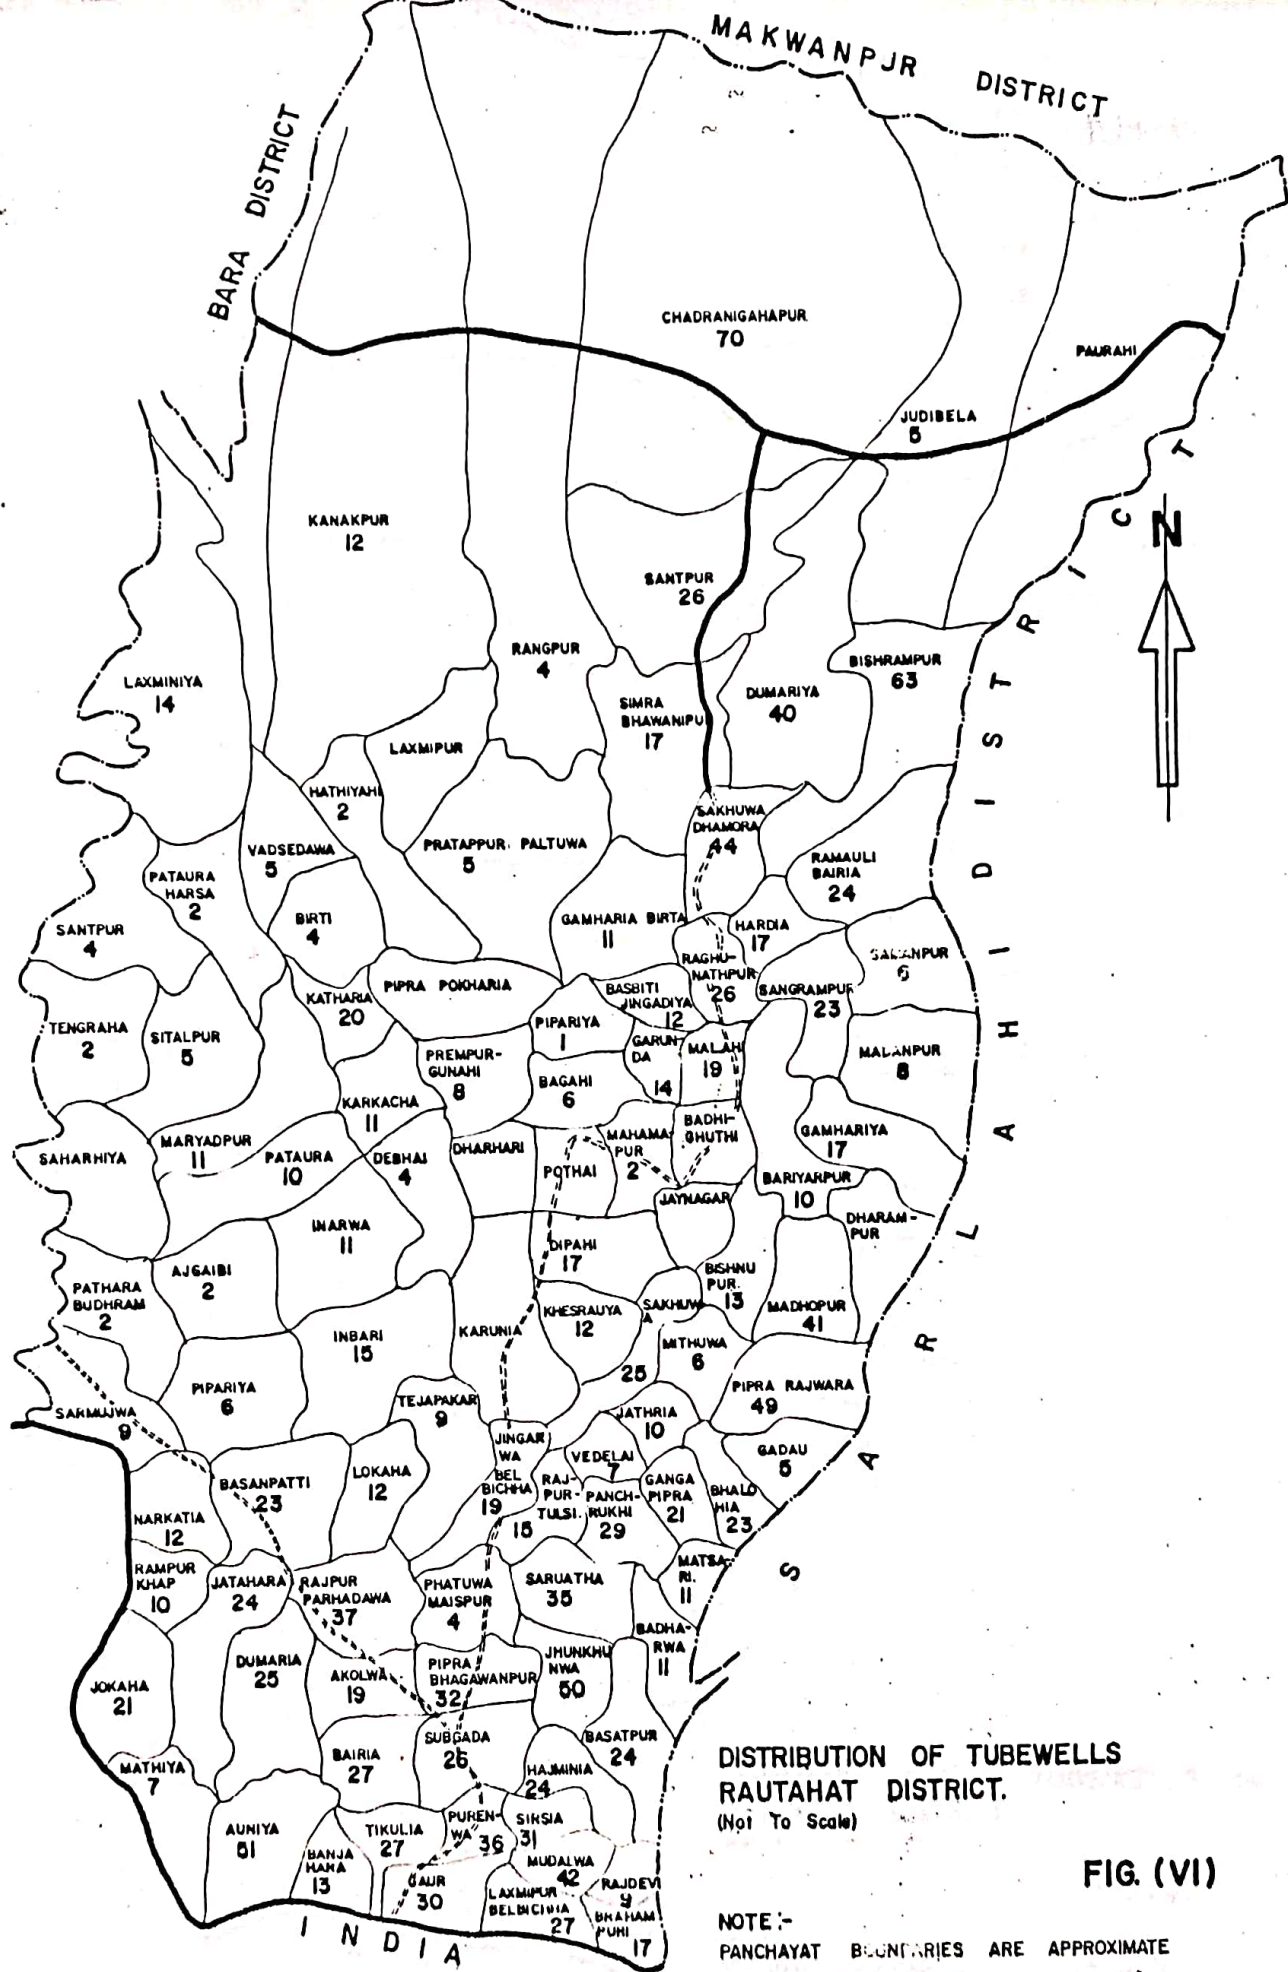

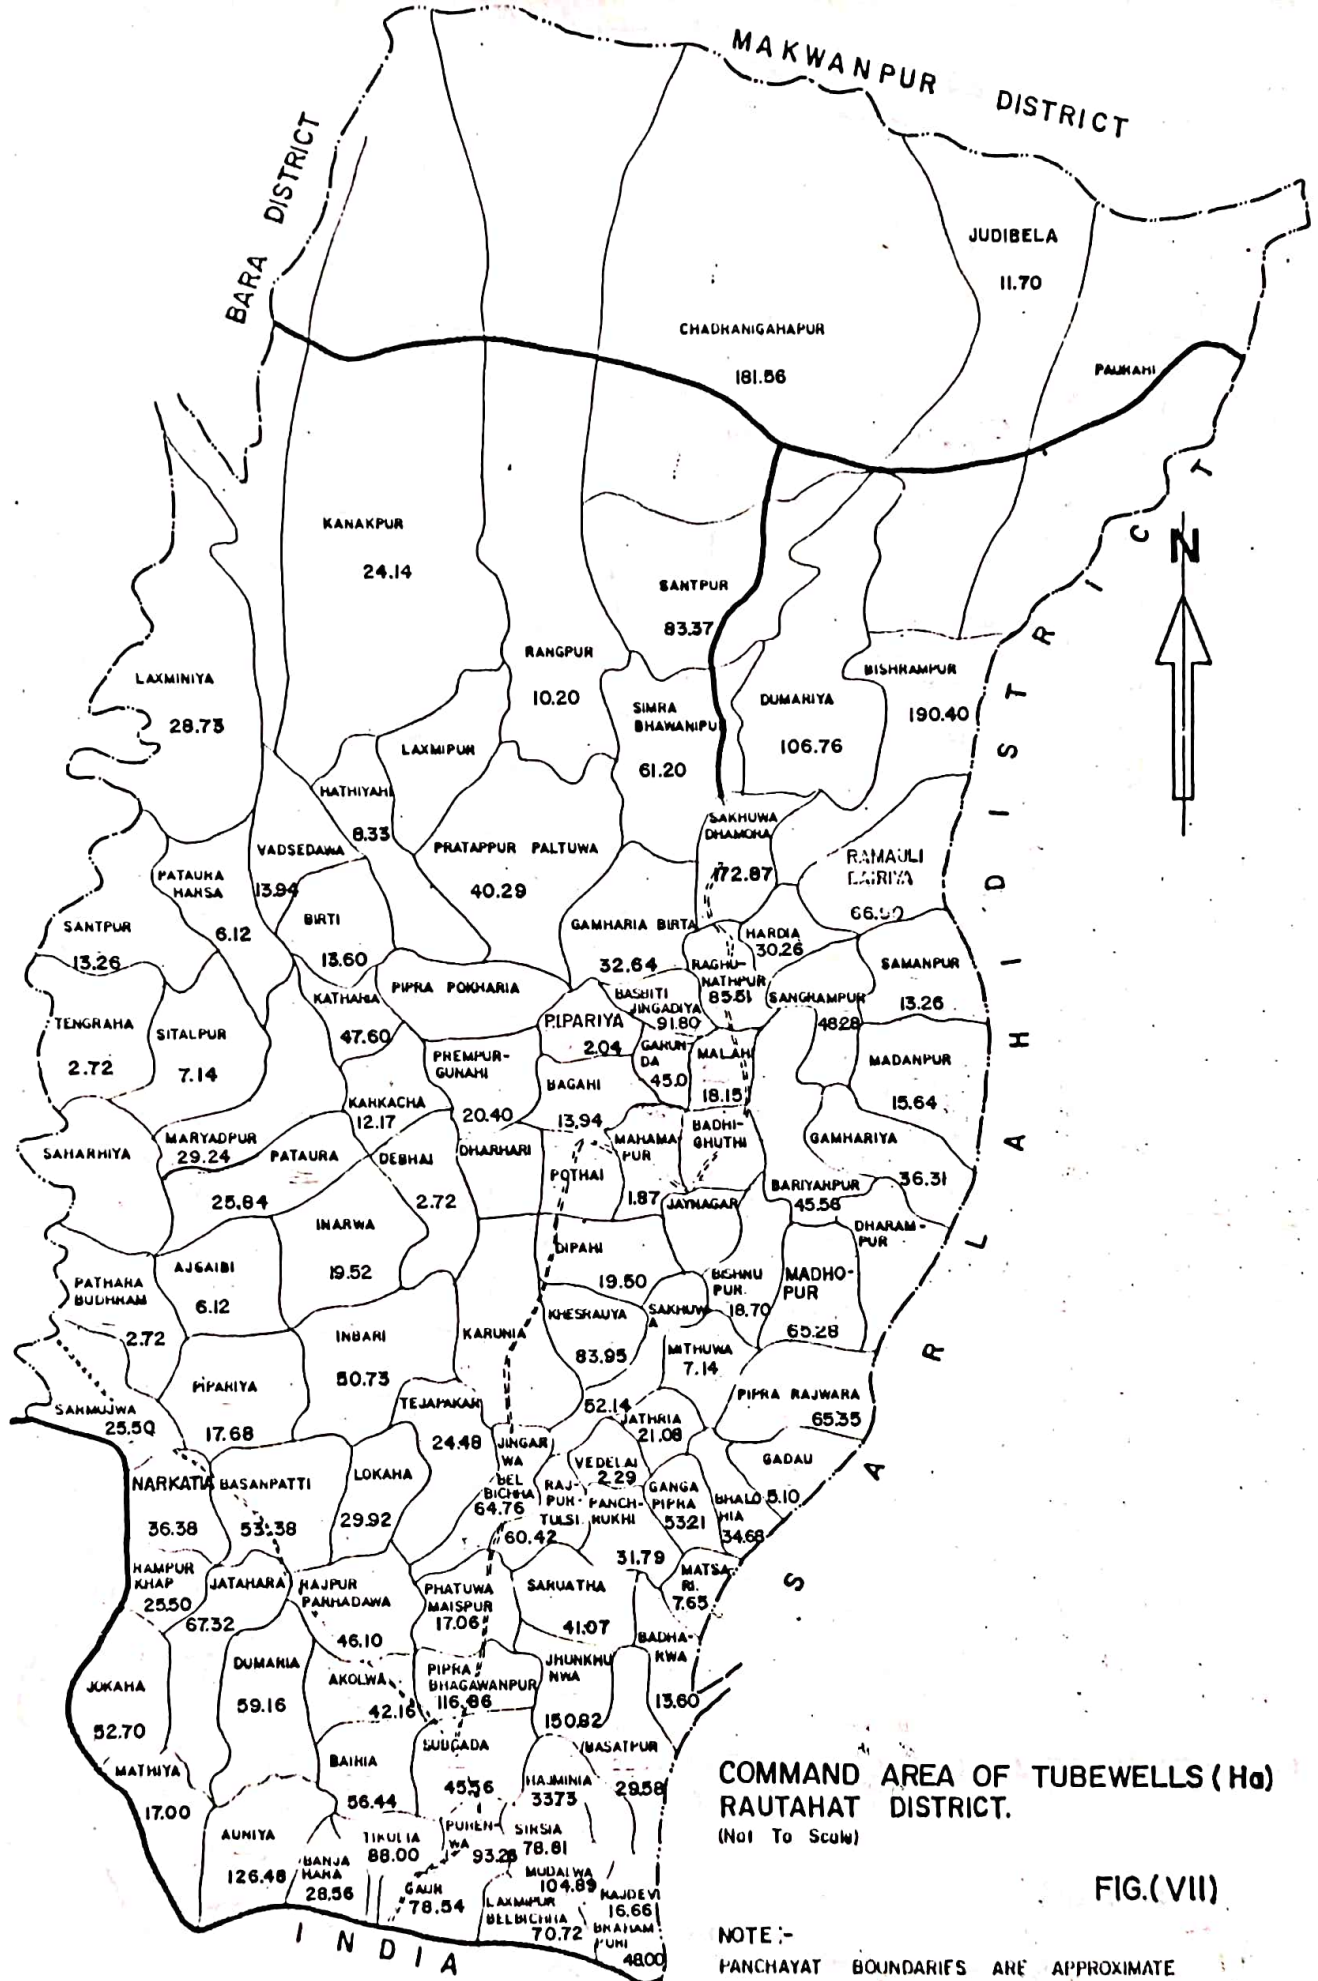

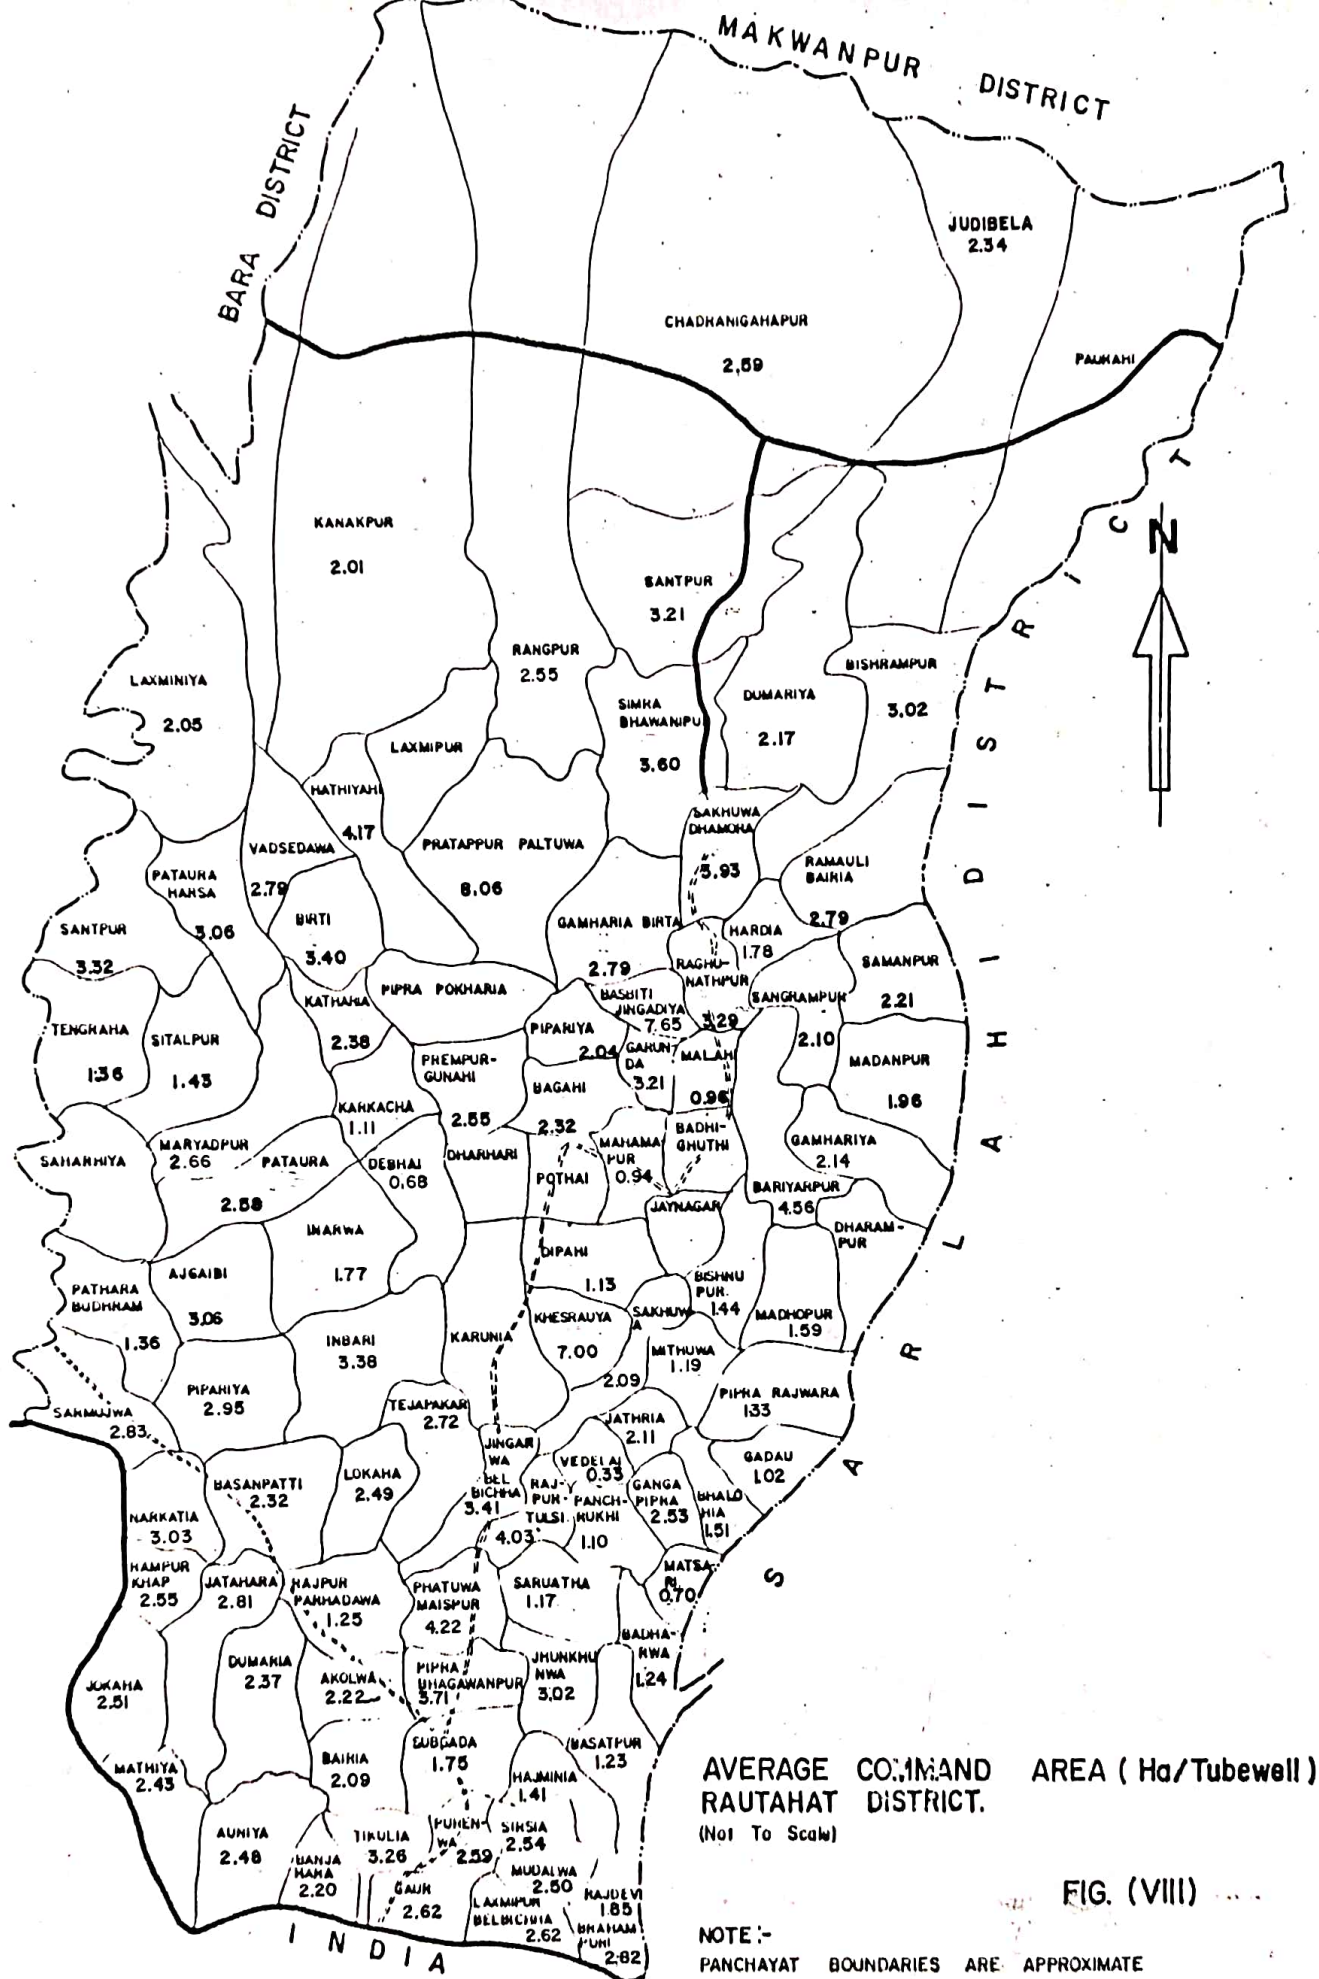

FIG. (VI)

NOTE:-  
PANCHAYAT BOUNDARIES ARE APPROXIMATE

## 8.2 Morang District

### 8.2.1 Numbers of Tubewells

There is one town panchayat (Biratnagar) and there are 65 village panchayats in Morang district. Installation of tubewells are found in Biratnagar Town Panchayat and 56 village panchayats of Morang district. Altogether 2493 numbers of tubewells have been installed in Morang district out of which 86 numbers are found damaged. Among 2493 tubewells installed, 1235 tubewells were installed from the loan of ADB/N, 2 numbers were installed by the Morang district panchayat, 3 numbers were installed by Ground Water Development Project and 1253 numbers were installed by private funds.

### 8.2.2 Command Area Covered

The 2493 tubewells irrigate 7175 ha of land in Biratnagar Town Panchayat and 56 village panchayats in Morang district. The average command area in Biratnagar Town Panchayat is 2.24 ha per tubewell and 3.04 ha per tubewell in rural area of this district. (Average command area is 2.88 ha per tubewell). The maximum and minimum intensity of the command areas has been calculated to be 4.70 ha per tubewell and 0.10 ha per tubewell respectively in Mirgauliya village panchayat and Sisbanibarhara village panchayat.

### 8.2.3 General Size of the Boreholes

Generally the size of borehole of the tubewells are 100 mm (4") diameter. The other popular size of boreholes is 38 mm (1.5"). In this district about 18% of the tubewells are 38 mm size. A small number of 200 mm size, 75 mm size and 50 mm size boreholes also exist in this district.

### 8.2.4 Operating Season

Generally tubewells are being operated year round. Generally, they are operated for winter crops and sometimes (when there is no timely rain) they are operated also for summer crops. Depending upon the type of the crop and the requirement of water in the field, the tubewells sometimes operates round the clock. However, on average the tubewells operates 3 to 12 hours a day for about 3 months a year.

### 8.2.5 Operating Mode

All 100 mm size, 200 mm size and 76 mm size tubewells are being operated by diesel and in rare case by electricity. The consumption of diesel for 100 mm size tubewell is normally 1.25 litre per hour and in case of electric it is 400 per hour. All 38 mm size and 50 mm size tubewells are operated manually by handsets or rower pumps.

#### 8.2.6 Average Depth of Tubewells

There is wide variation in the depth of tubewells from one place to another. For 100 mm size and 200 mm size tubewells the depth varies from 10 metre to 31 metre and in some particular cases even upto 40 metres. In case of 38 mm size tubewells the depth varies from 7 metres to 26 metres. Thus the average depth of tubewells is generally 20 metres.

#### 8.2.7 Yield

The yield value of the crops has been found different from place to place depending upon the type and nature of the soil and other factors. However, the average yields recorded are 0.8 to 1.2 mt/ha per crop.

#### 8.2.8 Panchayatwise List of Tubewells

The list of shallow tubewells of the Morang District showing total numbers, financing agencies and wardwise distribution of tubewells (village panchayatwise) is given in Table - 20.

#### 8.2.9 Panchayatwise Distribution of Tubewells and Command Area

The panchayatwise distribution of tubewells, panchayatwise command area covered by tubewells and average command area for tubewell are shown in Fig. IX, Fig. X and Fig. XI respectively.

#### 8.2.10 Profile of Tubewells

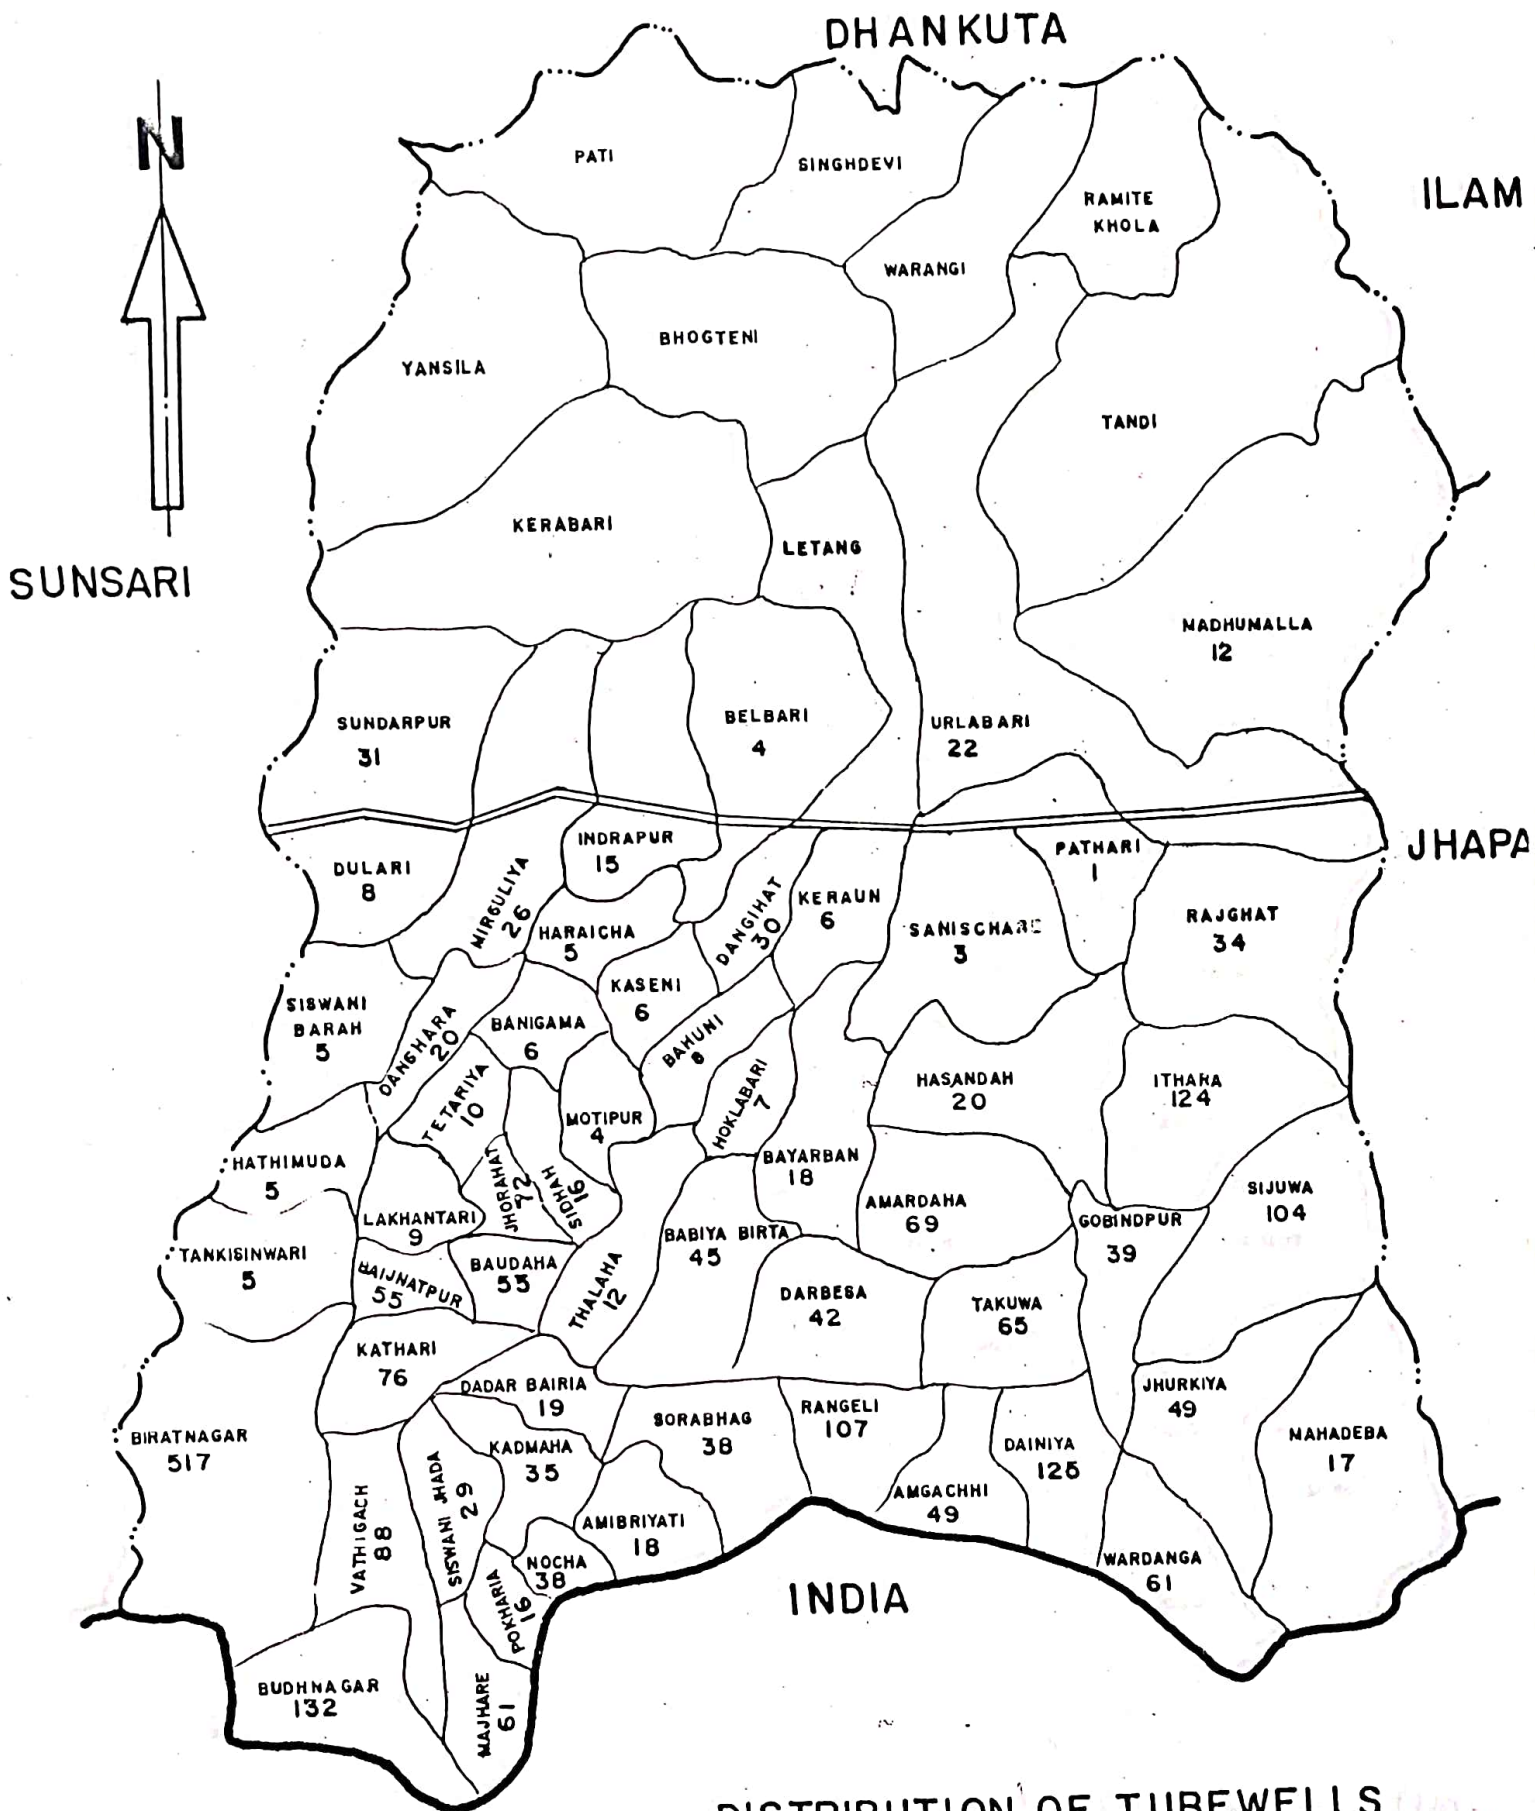

The profile of 2493 existing tubewells of Morang district is given in Appendix - B.

## 9. COMPARATIVE STUDY

The data collected during the desk study from various sources is compared with those data collected in the field.

The final profile of tubewells of Rautahat and Morang district is presented in Appendix - A and Appendix - B.

During the desk study, two major data sources were considered. (1) data collected by GWDC Ltd. Cambridge and (2) data collected from Agricultural Development Bank. These data were verified with the field data collected during the field visit.

In Rautahat district the number of tubewells recorded by GWDC Ltd. (during mid 1988) were 745 numbers, whereas the data collected from Agricultural Development Bank, Kathmandu Office was 685 numbers. During field visit (early 1989) the total number of tubewells recorded was 1647 out of which 847 were financed by ADB/N, 744 were installed privately, 29 were installed by District Panchayat, 21 were installed by Ground Water Development Project and 6 were installed by other agencies. Table - 21 shows comparative study of tubewells of Rautahat District.

Table - 21

Desk Study	685	-	-	-	-	685
From GWDC Ltd. Report (Mid. 1988)	-	-	-	-	-	745

-----

In Morang District, the number of tubewells recorded by GWDC Ltd. (during mid 1988) were 1,278. Whereas the data collected from various offices in Kathmandu was 1,150 numbers. (ADB/N: 1,022, GWDP: 28 and SIRDP: 100).

During field visit (early 1989) the total number of tubewells recorded was 2,493 out of which 1,235 were funded by ADB/N, 1,253 were installed privately, 2 were installed by District Panchayat and 3 were installed by Ground Water Development Project.

Table - 22 shows comparative study of tubewells of Morang District.

## 10. CONCLUSIONS AND RECOMMENDATIONS

This Inventory Study of Tubewells (1989), when compared with the report prepared by Ground Water Development Consultant (International) Limited, Cambridge (1988) provides the following differences.

- a. 902 numbers of tubewells are increased in this study (121%) in Rautahat district and 1215 numbers of tubewells are increased (95%) in Morang District.
- b. Likely the GWDC study does not include private tubewells.
- c. In Rautahat District, the number of tubewells recorded in the field verification (1,647) when compared with the desk study (685) has been found in the ratio of 2.40. Similarly, when compared with the data from GWDC Ltd. (745) has been found in the ratio of 2.21.

In Morang District, the number of tubewells recorded in the field verification (2,493) when compared with the desk study (1,150) has been found in the ratio of 2.16. Similarly, when compared with the data for GWDC Ltd. (1,150) has been found in the ratio of 1:95.

- d. In order to obtain reasonably correct records, study of all other terai districts is recommended.
